SUMMARY OF EPISODE/DAMAGE (Continue on page 2, if necessary).

On February 18, 2016, [REDACTED] contacted the Fresno County Agricultural Commissioner's Office (CAC) regarding suspected drift damage to two newly planted alfalfa fields totaling 333 acres. Fresno CAC photographed and mapped the damage in the field. Fresno County staff observed a drift pattern and on February 19, collected a five point gradient sample.

On February 25, [REDACTED] submitted a Report of Loss, Nonperformance or Damage Report (ROL) to Fresno CAC. The ROL contained information that on January 25, 2016 the [REDACTED] pilot observed an application by [REDACTED] to an adjacent fallow field. About one week after the application, herbicide symptoms began to develop in the alfalfa fields.

On March 1, 2016, Fresno County Agricultural Commissioner and Sealer verified that it appears that more than 20% of the acreage will need to be replanted and the cost to the grower will be in an excess of \$20,000.00. Fresno CAC is continuing to investigate the incident.
